

THI

GOVERNMENT POLYTECHNIC, DHENKANALLESSON PLAN: THEORY OF MACHINES4<sup>TH</sup> SEMESTER (2024- 2025)

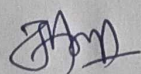

|  |   |  |
|--|---|--|
| Discipline:<br><b>Mechanical Engineering</b> | Semester: 4 <sup>th</sup>                             | Name of the Teaching Faculty: <b>PRADEEP KUMAR JENA</b>                                    |
| Subject:<br><b>TOM</b>                       | No. of Days/<br>per week class<br>allotted: <b>04</b> | Semester From Date: <b>04/02/2025</b> To Date: <b>17/05/2025</b><br>No of weeks: <b>14</b> |
| <b>Week</b>                                  | <b>Class day</b>                                      | <b>Theory / Practical Topics</b>   |
| <b>1<sup>ST</sup></b>                        | <b>1<sup>ST</sup></b>                                 | <b>SIMPLE MECHANISM:</b><br>Link, Kinematic chain, mechanism, machine                      |
|  | <b>2<sup>ND</sup></b>                                 | Inversion, four bar link mechanism and its inversion                                       |
|  | <b>3<sup>RD</sup></b>                                 | Lower pair and higher pair   |
|  | <b>4<sup>TH</sup></b>                                 | Lower pair and higher pair   |
| <b>2<sup>ND</sup></b>                        | <b>1<sup>ST</sup></b>                                 | Cam and followers  |
|  | <b>2<sup>ND</sup></b>                                 | Cam and followers  |
|  | <b>3<sup>RD</sup></b>                                 | <b>FRICTION:</b><br>Friction between nut and screw for square thread, screw jack           |
|  | <b>4<sup>TH</sup></b>                                 | Bearing and its classification, Description of roller, needle roller & ball bearings       |
| <b>3<sup>RD</sup></b>                        | <b>1<sup>ST</sup></b>                                 | Bearing and its classification, Description of roller, needle roller & ball bearings       |
|  | <b>2<sup>ND</sup></b>                                 | Torque transmission in flat pivot & conical pivot bearings.                                |
|  | <b>3<sup>RD</sup></b>                                 | Torque transmission in flat pivot & conical pivot bearings.                                |
|  | <b>4<sup>TH</sup></b>                                 | Flat collar bearing of single and multiple types   |
| <b>4<sup>TH</sup></b>                        | <b>1<sup>ST</sup></b>                                 | Torque transmission for single and multiple clutches                                       |
|  | <b>2<sup>ND</sup></b>                                 | Working of simple frictional brakes.   |
|  | <b>3<sup>RD</sup></b>                                 | Working of simple frictional brakes.   |
|  | <b>4<sup>TH</sup></b>                                 | Working of Absorption type of dynamometer  |
| <b>5<sup>TH</sup></b>                        | <b>1<sup>ST</sup></b>                                 | <b>POWER TRANSMISSION:</b><br>Concept of power transmission                                |
|  | <b>2<sup>ND</sup></b>                                 | Type of drives, belt, gear and chain drive.  |
|  | <b>3<sup>RD</sup></b>                                 | Computation of velocity ratio, length of belts (open and cross) with and without slip.     |
|  | <b>4<sup>TH</sup></b>                                 | Ratio of belt tensions, centrifugal tension and initial tension                            |

|                  |                 |   |
|------------------|-----------------|---|
| 6 <sup>TH</sup>  | 1 <sup>ST</sup> | Power transmitted by the belt.  |
|                  | 2 <sup>ND</sup> | Determine belt thickness and width for given permissible stress for open and crossed belt considering centrifugal tension.      |
|                  | 3 <sup>RD</sup> | Determine belt thickness and width for given permissible stress for open and crossed belt considering centrifugal tension.      |
|                  | 4 <sup>TH</sup> | V-belts and V-belts pulleys   |
| 7 <sup>TH</sup>  | 1 <sup>ST</sup> | Concept of crowning of pulleys.   |
|                  | 2 <sup>ND</sup> | Gear drives and its terminology.  |
|                  | 3 <sup>RD</sup> | Gear trains, working principle of simple, compound, reverted and epicyclic gear trains.   |
|                  | 4 <sup>TH</sup> | <b>GOVERNORS AND FLYWHEEL:</b><br>Function of governor  |
| 8 <sup>TH</sup>  | 1 <sup>ST</sup> | Classification of governor  |
|                  | 2 <sup>ND</sup> | Working of Watt, Porter, Proell and Hartnell governors.   |
|                  | 3 <sup>RD</sup> | Working of Watt, Porter, Proell and Hartnell governors.   |
|                  | 4 <sup>TH</sup> | Conceptual explanation of sensitivity, stability and isochronisms.  |
| 9 <sup>TH</sup>  | 1 <sup>ST</sup> | Conceptual explanation of sensitivity, stability and isochronisms.  |
|                  | 2 <sup>ND</sup> | Function of flywheel.   |
|                  | 3 <sup>RD</sup> | Function of flywheel.   |
|                  | 4 <sup>TH</sup> | Comparison between flywheel & governor.   |
| 10 <sup>TH</sup> | 1 <sup>ST</sup> | Fluctuation of energy and coefficient of fluctuation of speed.  |
|                  | 2 <sup>ND</sup> | <b>BALANCING OF MACHINE:</b><br>Concept of static and dynamic balancing   |
|                  | 3 <sup>RD</sup> | Concept of static and dynamic balancing   |
|                  | 4 <sup>TH</sup> | Static balancing of rotating parts.   |
| 11 <sup>TH</sup> | 1 <sup>ST</sup> | Principles of balancing of reciprocating parts.   |
|                  | 2 <sup>ND</sup> | Causes and effect of unbalance.   |
|                  | 3 <sup>RD</sup> | Difference between static and dynamic balancing   |
|                  | 4 <sup>TH</sup> | Difference between static and dynamic balancing   |
| 12 <sup>TH</sup> | 1 <sup>ST</sup> | <b>Discussion and Revision</b>  |
|                  | 2 <sup>ND</sup> | <b>VIBRATION OF MACHINE PARTS:</b><br>Introduction to Vibration and related terms (Amplitude, time period and frequency, cycle) |
|                  | 3 <sup>RD</sup> | Introduction to Vibration and related terms (Amplitude, time period and frequency, cycle)                                       |
|                  | 4 <sup>TH</sup> | Classification of vibration.  |

|                  |                 |   |
|------------------|-----------------|---|
| 13 <sup>TH</sup> | 1 <sup>ST</sup> | Classification of vibration.                        |
|                  | 2 <sup>ND</sup> | Basic concept of natural, forced & damped vibration |
|                  | 3 <sup>RD</sup> | Basic concept of natural, forced & damped vibration |
|                  | 4 <sup>TH</sup> | Torsional and Longitudinal vibration.               |
| 14 <sup>TH</sup> | 1 <sup>ST</sup> | Causes & remedies of vibration.                     |
|                  | 2 <sup>ND</sup> | Causes & remedies of vibration.                     |
|                  | 3 <sup>RD</sup> | Revision  |
|                  | 4 <sup>TH</sup> | Revision  |
